

HYCON HPP09 POWER PACK

HYDRAULIC THROTTLE CONTROL SYSTEM

VERY COMPACT

EASY TO CLEAN

PRODUCT FEATURES

The HPP09 operates any 20 lpm tools such as breakers, saws, pumps, and core drills at maximum performance.

It features a hydraulic throttle control system (Power On Demand) that automatically accelerates the engine when the connected tool is activated.

This power pack is very popular in the rental business and with contractors, municipalities, and supply companies.

It is very compact, enabling transportation in the back of a car or van. The investment in this power pack and a breaker is usually less than half the price of a four m³ compressor and breaker, delivering a similar performance.

The power pack has an integrated oil alert on the engine oil level.

HYDRAULIC POWER PACK HPP09

Item no.	2020009
