

# HYCON HWP4 SUBMERSIBLE PUMPS

**NO PRIMING, NO DOWNTIME**

**HIGH CAPACITY EVEN FOR  
GROUND WATER LOWERING APPLICATIONS**

**HANDLES DIRTY WATER AND SOLIDS**

## PRODUCT FEATURES

The HWP4 pump is in a league of its own. With a capacity of up to 120 m<sup>3</sup>/h, it can be used even in groundwater-lowering applications, where much more extensive and costly pumps are usually used.

Paired with, for instance, our 11-kW electric or 18-hp gasoline power packs, you will have a heavy-duty solution with

remarkable cost reductions compared with other pumping systems. The direct drive motor ensures an all-day, everyday operation without damage to the engine or the seals if the pump runs dry.

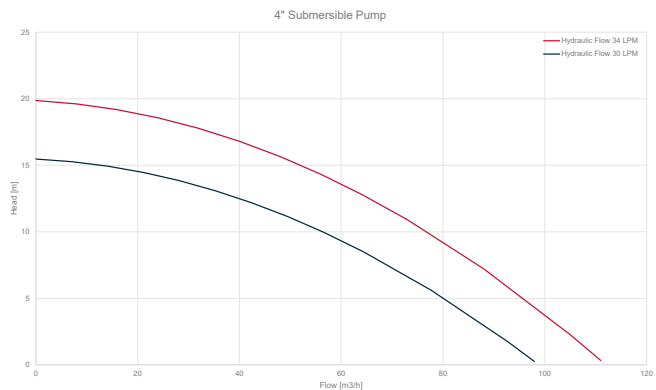

The clever impeller design makes the pump unaffected by particles size up to 74 mm.
