

HYCON HH10RV PICK HAMMER

LOW-WEIGHT COMPACT DESIGN

WELL PROTECTED TRIGGER HANDLE

SUITABLE FOR NARROW WORKING SPACES

PRODUCT FEATURES

HYCON HH10RV is an exceptionally handy, lightweight pick hammer designed for horizontal breaking in walls, brick walls, and reinforced concrete. The low weight and compact design make it very suitable for narrow working places.

The HH10RV is a prevalent hammer among contractors, telecom, and supply companies (power-water-gas-sewage) and is a true "hit" for rental.

HH10RV is the strongest 10 kg pick hammer on the market, and no pneumatic nor electric breaker has anything like the same performance.

The standard tool size is hex 19 x 50 mm. The hammer can be supplied from any HYCON HPP power pack with a 20-lpm option.

HYDRAULIC PICK HAMMER HH10RV
